The Appeal Brief received 28 February 2005 has been made of record. Claims 1-19 are pending. Claims stand withdrawn.

The finality of the previous office action is hereby withdrawn. Prosecution on the merits is reopened.

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Newly added “only” at line 3 of claim 1 is seen as new matter. This modifier is not seen as inherently described.

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The use of “only” at line 3 of claim 1.

4. Claims 1, 2, 4-6, 8-12 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Castle.

5. Claims 13-16 rejected under 35 U.S.C. 103(a) as being unpatentable over Castle in view of Munzmay.

Each of the above rejections is maintained for reasons of record. Applicants’ arguments in traversal appear to focus on the allegation that their “preheating” step distinguishes

over the prior art. It is the examiners position that the milling step of Castle qualifies as a preheating step within the limitations of applicants claims. The modifier "only", while seen as new matter, is not seen as distinguishing over the prior art even if it were properly incorporated into the claims. "Only pre-heating" is not seen as limiting the means of generating the heat which means could be milling.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Katarzyna Wyrozebski whose telephone number is (571) 272-1127. The examiner can normally be reached on M-Th from 6:30 to 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan, can be reached on 571 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
